How We Learned to Stop Worrying and Embrace the Chaos

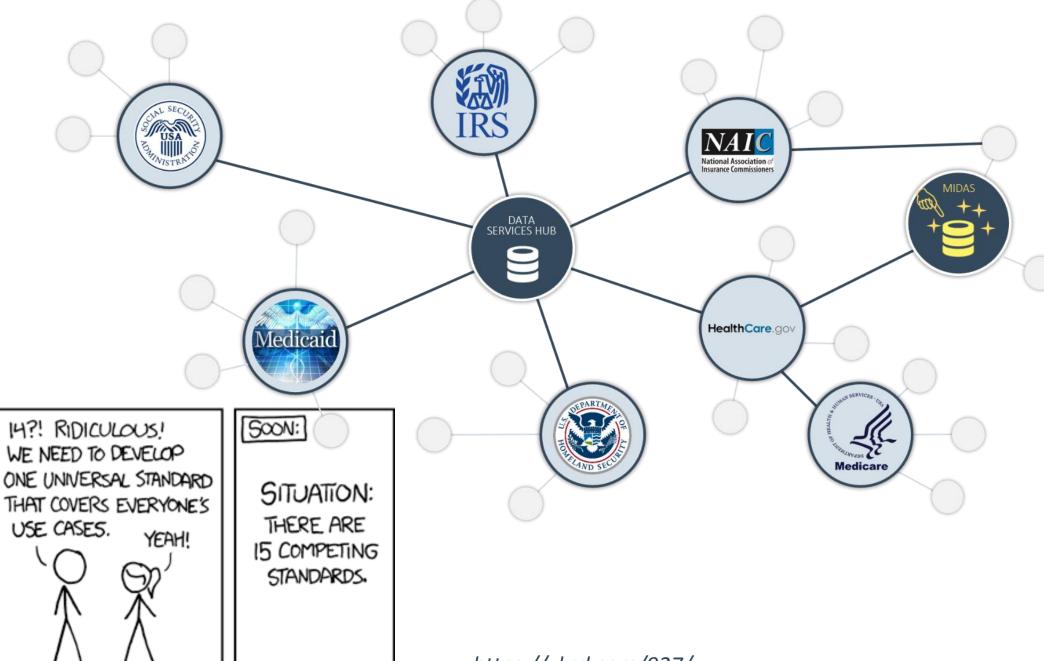

Peter Mork (Noblis)

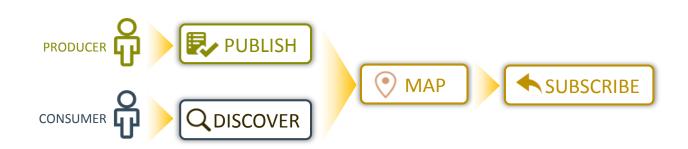

Adriane Chapman (University of Southampton)

Arnie Rosenthal (MITRE)

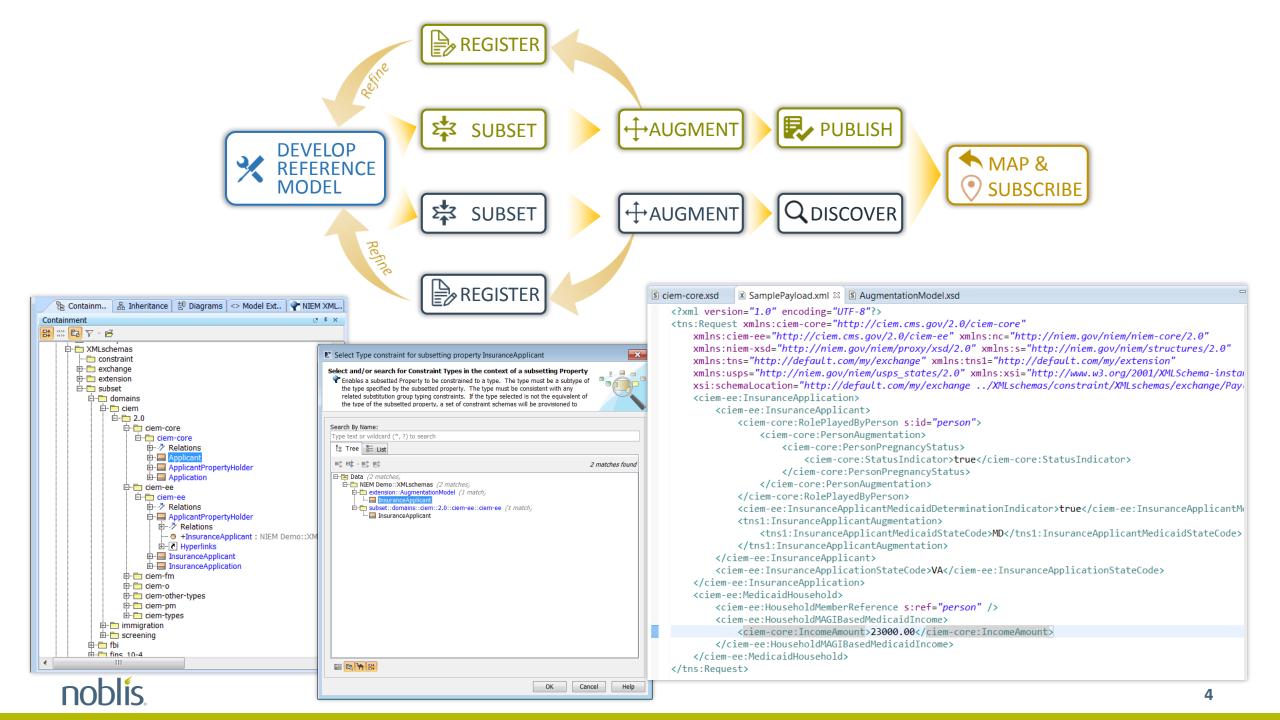

SITUATION: THERE ARE 14 COMPETING STANDARDS.

TASK-BASED USERS

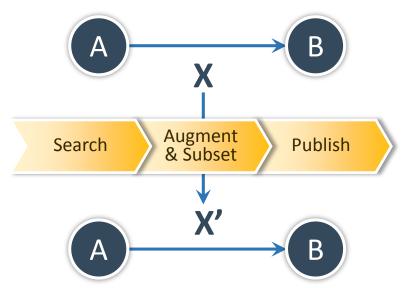

Use Case 1

Private, established relationship needs expansion: A and B already share information using schema X

	В	С
1	Element Name	Element Description
2	SSN	Applicant Social Security Number
3	First Name	Applicant First Name
4	Middle Name	Applicant Middle Name
5	Last Name	Applicant Last Name
6	Date Of Birth	Date of Birth
7	Gender Code	Applicant Gender
8	Name Suffix	Name Suffix

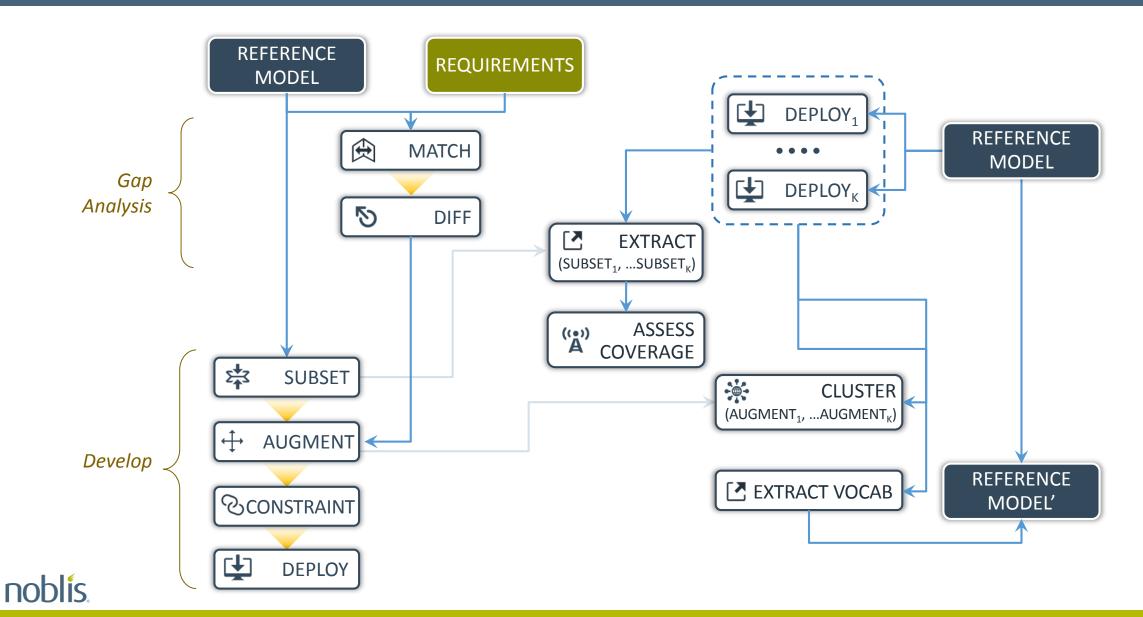

9	Effective From Date	Beginning date for which the Requestor checks eligibility (date when the application is submitted)
10	Effective To Date	End date for which the Requestor (FFE) checks eligibility (end of the eligibility year)

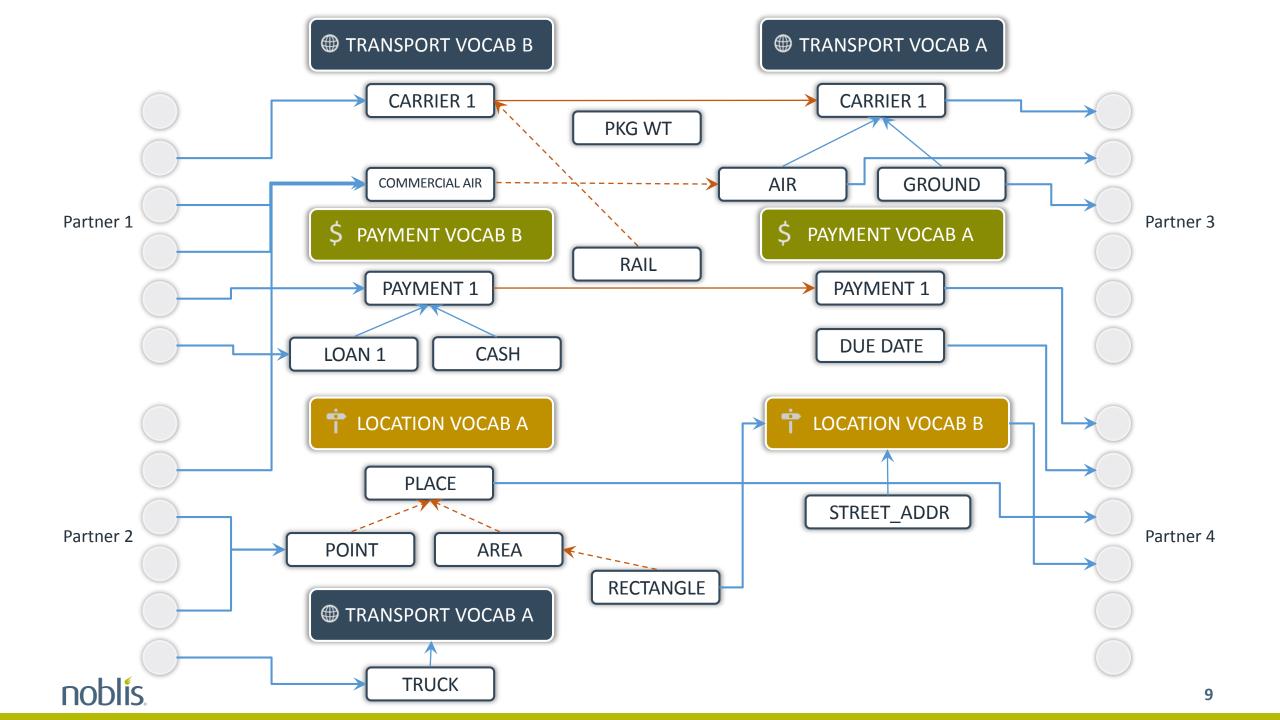

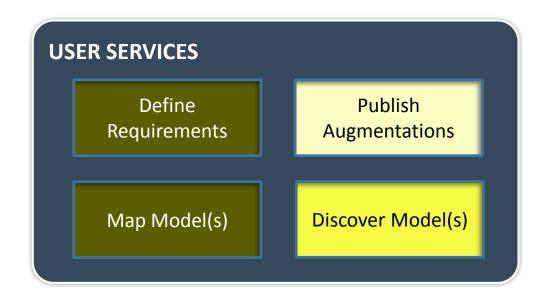

Enterprise needs a new exchange based on reference model, which is closely coupled to emerging requirements

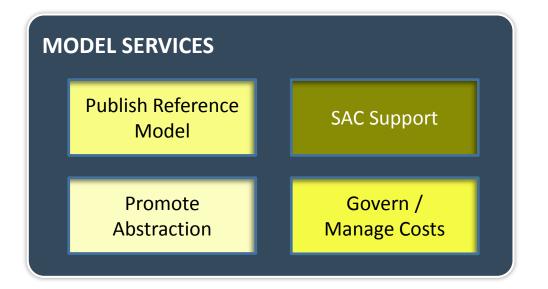

Community members need a new exchange based on reference model, which is loosely coupled to emerging requirements
